LAMPIRAN

44

Sekali lagi kami bangga untuk meluncurkan laporan kuartalan kami untuk Q3 2018. Saya ingin mengambil kesempatan ini untuk berterima kasih kepada seluruh *Tim CoinGecko* atas usaha dan kerja keras yang mereka lakukan untuk mengembangkan wawasan dokumen ini.

Terima kasih khuses kepada tim di *Masternodes.online* dan *Nonfungible.com* yang bermitra dengan kami untuk memberikan wawasan luar biasa pada pandangan terhadap Token Masternodes dan Non-fungible.

Juga, masalah ini diisi dengan wawasan dan analisis yang disusun selama kuartal terakhir ICO, Bursa, Distribusi Pasar, Keamanan token dan banyak lagi.

Seperti biasa, kami menyambut setiap komentar atau umpan balik untuk membantu kami meningkatkan laporan ini untuk lebih lanjut.

Selamat membaca!

DANIEL CHENG, EDITOR
daniel@coingecko.com

Catatan Founder:

Di kuartal ini, harga cryptocurrency dan kapitalisasi pasar mengalami lebih sedikit volatilitas dibandingkan dengan kuartal sebelumnya. Namun, meskipun tren harga turun, volume perdagangan terus berada pada level yang kurang lebih sama.

Menjelang akhir kuartal terakhir, kami juga mulai mengamati pergeseran besar volume perdagangan ke pertukaran dengan penghasilan dari penambangan trans-fee. Kami terus menyaksikan tren ini pada kuartal ini. Lebih khusus lagi, volume perdagangan pada Fcoin dan Bitforex mengalami lonjakan besar selama periode tertentu di kuartal sebelum mundur secara signifikan. Hal ini menimbulkan pertanyaan kontroversial apakah penambangan trans-fee berkelanjutan. Ada juga obrolan seputar tentang transfer-fee dari penambangan dengan adanya pencucian dari perdangan dan volume perdagangan yang meningkat secara artifisial.

Ada juga peningkatan yang ditandai dalam popularitas stablecoin. Pembuat DAO, perusahaan di belakang stablecoin Dai menarik investasi \$ 15 juta dari Andreessen Horowitz yang mewakili 6% dari total pasokannya. Kami juga melihat stablecoin lain yang diatur diluncurkan seperti Gemini USD dan Paxos Standard.

Juga, pertumbuhan proyek Masternodes & Non-Fungible Token (NFT) telah signifikan. CoinGecko telah bermitra dengan sangat baik untuk menampilkan wawasan khusus ke dua mitra ini. Ke depan, kami melihat Masternodes memainkan peran yang lebih menonjol di pasar bearish. Adapun NFTs, kami melihat pertumbuhan dalam kasus penggunaan dan bersemangat untuk kemana ini akan menuju.

Harga ETH telah mengalami penurunan pada kuartal ini, mungkin disebabkan oleh pelambatan yang signifikan dalam peluncuran ICO. Kami juga melihat gerakan menuju Penawaran dari efek token (STO) dengan pemain besar seperti Coinbase, SIX, CIRCLE, dan ICE mempersiapkan akhir dari peluncuran. Meskipun kami mengantisipasi 2019 sebagai tahun STO, banyak detail yang belum terungkap. Sebagai contoh, akan menarik untuk mengetahui negara dan badan pengatur mana yang akan paling ramah terhadap STO.

Platform Smart Contract

Perincian Adopsi dan Popularitas

Skenario: ERC-20 tetap pilihan populer untuk ICO

Pasar ICO masih didominasi oleh standar token Ethereum ERC-20. Namun, kami melihat tren peningkatan penerbitan token di platform lain seperti Stellar, NEO, dan NEM yang menghasilkan kecepatan transaksi lebih cepat dengan biaya transaksi yang lebih rendah. EOS belum lepas landas dengan hanya satu ICO sukses yang diterbitkan menggunakan platform pada Q3 2018.

Token Non-Fungible

Pendahuluan: Apakah mereka dan apa kegunaan mereka?

Token non-fungible (atau NFTs) adalah kelas baru dari aset digital yang disimpan dan ditangani pada blockchain. Aset ini dicirikan sebagai:

- Unik
- Tak Tergantikan
- Tidak dapat dipertukarkan

Token non-fungible bukan cryptocurrency. Mereka tidak diperdagangkan di bursa seperti token lainnya. Mereka tidak dibangun di atas standar teknis yang sama sebagai token yang sepadan.

Standar populer untuk NFT adalah protokol Ethereum ERC-721.

Token Non-Fungible

Tren Pasar : Volume Transaksi Mingguan (USD) (untuk 20 Proyek NFT yang paling populer)

NonFungible X CoinGecko

Data by: nonfungible.com

Volume perdagangan (USD) sangat bervariasi setiap bulan. Kami mengamati perlambatan bertahap di pasar CryptoKitties setelah lonjakan besar dalam volume. Decentraland memiliki volume yang relatif tinggi, meskipun memiliki transaksi yang jauh lebih sedikit. Gods Unchained dan MegaCryptoPolis menyumbang sebagian besar volume selama paruh akhir kuartal ini.
