

Ruby - Bug #10807

Segfault on arm - ruby trunk, 2.2, 2.1

01/31/2015 01:36 PM - oceyral (Olivier Ceyral)

Status:	Third Party's Issue	
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:	ruby 2.3.0dev (2015-01-30 trunk 49442) [armv7l-linux-eabi]	Backport: 2.0.0: UNKNOWN, 2.1: UNKNOWN, 2.2: UNKNOWN

Description

First, apologies if this is a duplicate or wrong place to report. I know next to nothing about ruby, so I don't even really understand the trace.

Anyway, trying to install gitlab (any recent version) on arm, I encounter a segfault when trying to precompile assets, more precisely a segfault while compiling therubyracer v0.12.0.

The error message : /home/git/gitlab/vendor/bundle/ruby/2.3.0/gems/therubyracer-0.12.0/lib/v8/function.rb:13: [BUG] Segmentation fault at 0x22bda0
See attached log file for full information.

Segfault occurs with ruby 2.1.5, 2.2.0, and snapshot all obtained from ruby-lang.org.

I could possibly make the arm server available to a dev for testing.

History

#1 - 01/31/2015 01:53 PM - usa (Usaku NAKAMURA)

- Status changed from Open to Third Party's Issue

The SEGV is caused in therubyracer's C extention.
So, you should report this to the developers of therubyracer first.

#2 - 01/31/2015 02:14 PM - oceyral (Olivier Ceyral)
