

Ruby - Feature #11312

Add Resolv::DNS::Resource::IN::SPF

06/26/2015 06:58 PM - postmodern (Hal Brodigan)

Status:	Assigned	
Priority:	Normal	
Assignee:	akr (Akira Tanaka)	
Target version:		
<div>Description</div> <p>The SPF type record (RFC4408 Section 3.1.1) is quite common now. The resolv library should probably support it. As a workaround I monkey patched in the resource class:</p> <pre>class Resolv::DNS::Resource::IN::SPF &lt; Resolv::DNS::Resource::IN::TXT   # resolv.rb doesn't define an SPF resource type.   TypeValue = 99   ClassValue = Resolv::DNS::Resource::IN::ClassValue    Resolv::DNS::Resource::ClassHash[[TypeValue, ClassValue]] = self end</pre> <p>I could formalize my monkeypatch into an actual patch. I would just need to know whether SPF should be listed in the ClassInsensitiveTypes array.</p>
