

Ruby - Bug #12448

vm_call_cfunc - cfp consistency error

05/31/2016 07:06 PM - jneander (Jeremy Neander)

Status:	Closed	Backport: 2.1: UNKNOWN, 2.2: UNKNOWN, 2.3: UNKNOWN
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:	ruby 2.2.4p230 (2015-12-16 revision 53155) [x86_64-darwin15]	
Description		
I am not sure what to say about this bug. I captured multiple ruby crash logs, plus the console output from one execution.		
Related issues:

History

#1 - 05/31/2016 07:36 PM - jneander (Jeremy Neander)

```
describe "DELETE destroy" do
  let(:term) { root_account.enrollment_terms.create! }
  let(:group) { group_helper.create_for_enrollment_term(term) }
  let(:period) { period.create_for_group(group) } # this is part of the problem

  it "destroys the requested grading period" do
    period
  end
end
```

Attempts to reproduce outside of the project result in stack overflows. The above code lives in a Rails 4.0.13 project.
