

Ruby - Feature #12735

TCP Server documentation improvement

09/07/2016 10:55 AM - Jishin (Julien BONNET)

Status:	Feedback	
Priority:	Normal	
Assignee:	zzak (zzak _)	
Target version:		
Description		
Between version 2.0.0 and 2.3.1, documentation has shrunk a lot. It could be useful to keep the original content and add the example <code>TCPServer.new('0.0.0.0', 2000)</code> to receive a connection from any PC connected to the network		

History

Could you please be more specific about which parts are missing?

I can not see big differences:

- <http://ruby-doc.org/stdlib-2.0.0/libdoc/socket/rdoc/TCPServer.html>
- <http://ruby-doc.org/stdlib-2.3.1/libdoc/socket/rdoc/TCPServer.html>
