

Ruby - Feature #12845

Do we need libruby-static.a?

10/17/2016 06:08 AM - ko1 (Koichi Sasada)

Status:	Closed	
Priority:	Normal	
Assignee:		
Target version:		
Description		
On install directory, lib/libruby-static.a consumes 53MB on my Ubuntu 16 machine (4.4.0-42-generic, gcc 5.4.0). (Because I always use --enable-shared option) libruby.so consumes 15MB on same build. Can we drop this libruby-static.a file from install file list? Does anyone use this file?
