

Ruby - Feature #17116

raise ArgumentError in Enumerator#new in no given blocks

08/11/2020 04:10 PM - S_H_ (Shun Hiraoka)

Status:	Closed
Priority:	Normal
Assignee:	
Target version:	
Description	
Currently, Enumerator#new allows this code (no block given):	
<pre>obj = Object.new Enumerator.new(obj)</pre>	
with a warning (since ruby-2.0.0-preview2):	
<pre>-e:1: warning: Enumerator.new without a block is deprecated; use Object#to_enum instead</pre>	
I think it's okay to remove this behaviour. And I think that it seems natural to raise ArgumentError if no block is given.
