

Ruby - Bug #21388

make install and bundled gems

05/31/2025 12:45 PM - MSP-Greg (Greg L)

Status:	Rejected	
Priority:	Normal	
Assignee:	hsbt (Hiroshi SHIBATA)	
Target version:		
ruby -v:	ruby 3.5.0dev (2025-05-31T09:43:52Z master 32c708efbd) +PRISM [x64-mingw-ucrt]	Backport: 3.2: UNKNOWN, 3.3: UNKNOWN, 3.4: UNKNOWN

Description

Two issues:

1. Currently, make install from the MinGW (UCRT) workflow shows two gems not being installed (syslog cannot be installed on Windows):

```
skipped bundled gems:
  csv-3.3.5.gem          not found in bundled_gems
  power_assert-2.0.6dev.gem not found in bundled_gems
  syslog-0.3.0.gem       not found in bundled_gems
```

A simple patch file will fix this:

```
diff --git a/gems/bundled_gems b/gems/bundled_gems
index 8891f1c462..ca66b48ed6 100644
--- a/gems/bundled_gems
+++ b/gems/bundled_gems

2. Sometime ago, one could cache the *.gem files, and they would not be downloaded. Now, regardless of the cache, they are always downloaded.

#4 - 06/06/2025 08:28 AM - hsbt (Hiroshi SHIBATA)

- Status changed from Assigned to Rejected

Please wait a stable release. master is development branch.

The bundled gems that are specified commit hash is also development status for resolving issues with ruby head. So they may be removed from the daily snapshot because that version does not exist in GitHub or rubygems.org.

#5 - 06/10/2025 09:40 AM - nobu (Nobuyoshi Nakada)

Another idea is that master will install snapshot gems.
