Ruby - Bug #5420

RubyGems misleading error message for "update -l"

10/07/2011 06:07 PM - rklemme (Robert Klemme)

Status:	Closed	
Priority:	Normal	
Assignee:	drbrain (Eric Hodel)	
Target version:	2.0.0	
ruby -v:	ruby 1.9.2p290 (2011-07-09 revision 32553) [i386-cygwin]	**Backport:**

Description

I accidentally used option -l for "update":

11:00:34 ~$ gem19 list -l facets

*** LOCAL GEMS ***

facets (2.9.1)
11:00:44 ~$ gem19 update -l
Updating installed gems
Updating facets
ERROR: While executing gem ... (Gem::GemNotFoundException)
Could not find a valid gem 'facets' (>= 0) locally or in a repository
11:01:15 ~$

The issue is with "... or in a repository": apparently the repository was not even searched because without "-l" it works:

11:01:15 ~$ gem19 update
Updating installed gems
Updating facets
Successfully installed facets-2.9.2
Gems updated: facets
Installing ri documentation for facets-2.9.2...
Installing RDoc documentation for facets-2.9.2...
11:03:56 ~$ gem19 list -l facets

*** LOCAL GEMS ***

facets (2.9.2, 2.9.1)
11:04:21 ~$

=begin
It seems this has been fixed.

$ GEM_HOME=~/tmp/gems/ GEM_PATH= ruby20 -Ilib bin/gem update -l builder
Updating installed gems
Updating builder
Fetching: builder-3.1.4.gem (100%)
Successfully installed builder-3.1.4

=end
