Ruby - Bug #653

`rake gem' emits a warning

10/17/2008 12:48 AM - mame (Yusuke Endoh)

Status:	Closed	
Priority:	Normal	
Assignee:	drbrain (Eric Hodel)	
Target version:	1.9.1 Release Candidate	
ruby -v:		**Backport:**

Description

=begin
Hi,

rake seems to call Gem.manage_gems which is deprecated at
lib/rake/gempackagetask.rb.

$ sow19 foo
(snip)
$ cd fo/
$ rake19
(in /tmp/foo)
<internal:0:Warning: Gem::manage_gems is deprecated and will be
removed on or after March 2009.
Hoe email value not set. aborting

Is it ok to merely remove the call?

The gempackagetask should probably be allowed to continue to work with older gems. Can we put a version test around this?

RubyGems back to 0.8.8 will work if Gem.manage_gems is replaced with:

require 'rubygems/builder'

since all manage_gems did was require extra files like this one.

As of today, these are the versions of RubyGems that accessed the repository recently:

```
$ cut -d ' ' -f 13 gemmirror-access_log | occur | grep RubyGems
80668: "RubyGems/0.9.4"
69239: "RubyGems/0.9.5
22181: "RubyGems/0.9.2"
12268: "RubyGems/1.0.1
11679: "RubyGems/0.9.0"
11155: "RubyGems/1.0.0
8813: "RubyGems/0.9.4.6
3153: "RubyGems/0.8.11"
1040: "RubyGems/0.8.10"
438: "RubyGems/0.9.3"
417: "RubyGems/0.9.1"
67: "RubyGems/0.9.4.7
26: "RubyGems/0.9.4.3"
25: "RubyGems/0.9.5"
5: "RubyGems/0.8.8"
3: "RubyGems/0.8.99.2"
2: "RubyGems/0.9.4.4"
2: "RubyGems/0.9.0.8"
1: "RubyGems/0.9.4
1: "RubyGems/0.9.4.5"
```

So I think you're fine to remove the Gem.manage_gems call.

It has been removed in both trunk and 1_9_1, I think this should be closed now.
