Ruby - Bug #8623

Make stable Gem::Specification.files in default .gemspecs

07/11/2013 05:56 PM - vo.x (Vit Ondruch)

Status:	Closed		
Priority:	Normal		
Assignee:	drbrain (Eric Hodel)		
Target version:			
ruby -v:	ruby 2.0.0p195 (2013-05-14 revision 40734) [x86_64-linux]	**Backport:**	1.9.3: DONTNEED, 2.0.0: DONE

Description

Although the .gemspec files for default gems are same in function, the different order of their "s.files" makes them different therefore possibly conflicting in multilib scenario. Simple sorting fixes this issue.

I've overlooked this ticket.

Hello vit, r43587 should be backported to ruby_2_0_0, doesn't it?

That would be sweet if you can backport. One less patch I need to maintain for Fedora.
