

Ruby - Bug #9391

Segfault after upgrade from ruby 2.0 to 2.1

01/10/2014 07:16 PM - lars.vonk@gmail.com (Lars Vonk)

Status:	Closed	
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:	ruby 2.1.0	Backport:
Description Hi, I also this message on the rubyforum but no reaction so far, therefor I am posting here as well. I upgraded our Sinatra app to ruby 2.1 and running our tests immediately result in a segfault. Attached my dependencies with versions and the full error message. Maybe someone can check if this has got to do with ruby 2.1 or one of my gems. I can't figure out were to start looking. Any pointers are helpful. Thanks in advance, Lars
