The European Commission will host an online kick-off meeting to officially present three new pilot projects funded under the Digital Europe Programme call on “GenAI for the public administrations”. The event highlights the Commission support to the uptake of trustworthy European generative AI solutions in public administrations across Europe.

The three projects — [FLOODS & DROUGHTS](https://digital-strategy.ec.europa.eu/en/news/floods-droughts-generative-ai-managing-floods-droughts-and-water-related-risks)

(<https://digital-strategy.ec.europa.eu/en/news/europai-reusable-european-generative-ai-solutions-public-administrations>)

(<https://digital-strategy.ec.europa.eu/en/news/europai-reusable-european-generative-ai-solutions-public-administrations>)— officially started on 1 July 2026 following the signature of their grant agreements. Together, they will help public administrations develop, procure, test and deploy European GenAI solutions that respond to concrete public-service needs,

while ensuring compliance with European legal, operational and societal requirements.

The kick-off meeting will be followed by an Apply AI stakeholder meeting open to public-sector representatives and other stakeholders. The discussion will explore the main opportunities and challenges associated with the adoption of AI in public administrations and how the European Commission can further support the public sector in developing, procuring and deploying trustworthy European AI solutions.

The event will also help connect the pilot projects with the broader Apply AI community and encourage exchanges and cooperation, which can lead to a wider uptake of successful GenAI solutions across Europe.

Draft Agenda

Part I - 14:00 - 15:00

- **Opening Speech by Lucilla Sioli**, Director of the European AI Office
- Presentation of the **GenAI for Public Administration Pilot Projects**
- Discussion followed by questions from the audience

Part II - 15:00 - 16:30

- **Presentation** by the European Commission
- **Interactive stakeholder workshop** discussing:
 - From experimentation to deployment in public administrations
 - Procurement, sovereignty and startups/SMEs role
 - Scaling solutions across European public administrations
 - EU support for AI uptake in public administrations
