Introduction

Regional data is collected, compiled, and disseminated by Eurostat based on the Nomenclature of Territorial Units for Statistics (NUTS). The NUTS classification was drawn up by Eurostat decades ago to provide a breakdown of the economic territory of the European Union ⁽¹⁾ into territorial units for supporting evidence-based political interventions at regional level. The NUTS classification has been used in EU legislation since 1988 ⁽²⁾, however, it was only encoded into a formal Regulation of the European Parliament and the Council in 2003 ⁽³⁾. The consolidated version of the NUTS Regulation is set out in Annex 1 of this document.

The NUTS classification can normally only be amended after at least three years have passed since the previous version. Amendments were established in 2006, 2010, 2013, 2016, 2021 and 2024 ⁽⁴⁾. Another, extraordinary amendment was organised in 2014 following a substantial reorganisation of the administrative structure in Portugal. The NUTS classification has been also updated following the EU enlargement rounds in 2004 and 2007. Croatia's accession to the EU was taken into account in the 2013 NUTS amendment and the withdrawal of the United Kingdom from the EU in the 2024 NUTS amendment. This publication covers the sixth, regular revision of the NUTS classification called 'NUTS 2024'. It came into effect on 1 January 2024 and replaced NUTS 2021.

Note that since 2021, NUTS versions are named after the year in which data becomes available with the new breakdown; before and up to NUTS 2016 inclusive, the versions were then named after the technical date of the adoption of the underlying legislation by the Commission. Correspondence tables showing the differences between every NUTS version since 1999 are available on Eurostat's website ⁽⁵⁾. This website also offers a visualisation of the different NUTS versions in the statistical atlas ⁽⁶⁾.

The NUTS serves several, interlinked objectives:

- It ensures harmonised standards in the collection and transmission of regional data;
- It guarantees that published regional statistics are based on comparable data;
- It enables the analysis and comparison of the socio-economic situation of the regions based on harmonised data;
- Policy interventions such as the European Structural and Investment Funds ⁽⁷⁾ can be specifically targeted to support disadvantaged and less competitive regions.

The purpose of this publication is to present the regions in the EU according to the NUTS 2024 classification in the form of tables and maps. It replaces the previous Eurostat publication on NUTS 2021 issued in 2020 (and revised in 2022) and includes all the changes which have taken place since then.

Typologies

In addition to the NUTS classification, this edition presents two out of the three territorial typologies on NUTS level 3, which have been introduced into the NUTS Regulation in 2017 ⁽⁸⁾. These are the urban-rural typology and the typology of coastal and non-coastal regions. The method for defining the type of regions gained legal status with the adoption of the act on uniform conditions for the harmonised application of the territorial typologies in 2019 ⁽⁹⁾. This Regulation is set out in Annex 3 of this publication. More details on the methodological background of territorial typologies are provided in the 2018 edition of the Eurostat Methodological manual on territorial typologies ⁽¹⁰⁾.

Territorial typologies help to analyse and to take into account the territorial dimension of economic, social, and environmental situations and developments by identifying territorial patterns that would otherwise not stand out from the geospatial diversity of different areas. With depiction of the urban-rural and coastal territorial typologies on the NUTS 3 maps, the reader is given additional information on regional characteristics such as urbanisation or maritime impact. The classification of NUTS level 3 regions, according to these two typologies, is presented in the last two columns of the NUTS tables shown later in this publication and is indicated by the colours and fill patterns of the regions in the NUTS 3 maps.

NUTS-based data

European regional statistics, according to the NUTS breakdown, can be accessed through Eurostat's public database ⁽¹¹⁾. Depending on the domain and variable concerned, regional statistics are available at one or more of the three NUTS levels.

Some examples of regional datasets available on Eurostat's website at the NUTS 2 level are:

- agriculture
 - animal populations
 - production of cow's milk on farms
- demography
 - population by age and sex
 - fertility rates by age
 - life expectancy by age and sex
- regional economic accounts
 - gross domestic product at current market prices
- labour market
 - employment by sex and age
 - average number of usual weekly hours of work in the main job
- education
 - number of students by age and sex
 - early leavers from education and training by sex
- poverty and social exclusion
 - at-risk-of-poverty-rate

⁽⁸⁾ [Regulation \(EU\) 2017/2391 of the European Parliament and of the Council of 12 December 2017](#) amending Regulation (EC) No 1059/2003 as regards the territorial typologies (Tercet). OJ L 350, 29.12.2017.

⁽⁹⁾ [Commission Implementing Regulation \(EU\) 2019/1130 of 2 July 2019](#) on the uniform conditions for the harmonised application of territorial typologies pursuant to Regulation (EC) No 1059/2003 of the European Parliament and of the Council. OJ L 179, 3.7.2019

... and many more, covering aspects of science and technology, business, tourism, transport, labour costs, information society, crime as well as environment and energy in addition to those mentioned above. A complete overview is available on Eurostat's website.

Tables and maps

The NUTS tables in this publication replicate the content of Annex I of the NUTS Regulation. Together with the maps, they are intended to enable the reader to locate the regions, to understand the territorial hierarchy, and to identify some basic regional characteristics. The official labels of the NUTS regions are those names used in the official language(s) of the country. However, for Bulgaria, Greece and Cyprus transliterations of the NUTS names into Latin characters are also shown. Please be aware that these Latin names are not official and merely provided for comprehension purposes. The countries are listed in the official protocol order, which is alphabetical, based on the spelling of each country in its own national language. The regional boundaries shown in the maps are indicative. The scales used in the maps differ depending on the country, while taking into account the visibility of regional boundaries and the readability of NUTS codes.

Basic principles

The NUTS classification subdivides the economic territory of the EU Member States into territorial units (regions), whereby the following principles apply:

a) The NUTS classification includes three hierarchical levels.

The classification is made up of three hierarchical levels: each Member State is divided into NUTS 1 regions, which in turn are subdivided into NUTS 2 regions and then further divided into NUTS 3 regions. Each of these regions is allocated a specific code and name. Since several different regions within Europe have the same name, a distinction has been made by adding to each of these the abbreviation for the country concerned. Table 1 shows the NUTS 1 region of Noord-Nederland of the Netherlands, including its breakdown into NUTS 2 (Groningen, Friesland and Drenthe) and NUTS 3 regions, as an example.

TABLE 1

Breakdown of NUTS levels in the example of The Netherlands

Code	NUTS 1	NUTS 2	NUTS 3	Urban rural typology	Coastal typology
NL1	Noord-Nederland				
NL11		Groningen			
NL112			Delfzijl en omgeving	2	1
NL114			Oost-Groningen	2	1
NL115			Overig Groningen	2	1
NL12		Friesland (NL)			
NL126			Zuidoost-Friesland	2	1
NL127			Noord-Friesland	2	1
NL128			Zuidwest-Friesland	2	1
NL13		Drenthe			
NL131			Noord-Drenthe	2	1
NL132			Zuidoost-Drenthe	2	0
NL133			Zuidwest-Drenthe	2	0

Some regions appear at more than one level (for example: Luxembourg appears as the country and also for NUTS levels 1, 2 and 3). In such cases, the codes end in zero for a region with an identical territory at the next lower level. For Luxembourg, the NUTS 1 code is 'LU0', the NUTS 2 code is 'LU00' and the NUTS 3 code is 'LU000'. The labels do not need to be identical at the different levels, even if the regions concerned cover identical territory.

b) NUTS favours administrative units ⁽¹²⁾ already existing in the Member States.

Existing administrative units within the Member States constitute the very first criterion for the definition of the NUTS regions. The main reason for this is that the existence of administrative structures usually supports the availability of data and the implementation capacity of policy measures.

If no administrative units exist for a given level, it must be constituted by aggregating smaller administrative units to that higher level. The aggregation must respect existing administrative divisions on a higher level and shall take geographical, socio-economic, historical, cultural, or environmental circumstances into consideration. The resulting aggregated units are referred to as 'non-administrative units'.

Examples of administrative and non-administrative units being designated as NUTS regions can be seen on Table 2.

TABLE 2

Examples of administrative and non-administrative units being designated as NUTS regions

NUTS level	Belgium	Czechia	France	Italy
NUTS 1	Gewesten/Régions	Území (non-administrative units)	Régions	Gruppi di regioni (non-administrative units)
NUTS 2	Provincies/Provinces	Regiony soudržnosti (non-administrative units)	Groupe des départements (non-administrative units)	Regioni
NUTS 3	Arrondissementen/ Arrondissements	Kraje	Départements	Province

Table 5 (see in a later chapter) provides an overview of the correspondence between NUTS levels and the national administrative and non-administrative layers per Member State.

c) The NUTS Regulation lays down minimum and maximum thresholds for the population size of the regions

For administrative layers, the average size of the regions in the respective level shall lie within the thresholds as shown in Table 3.

⁽¹²⁾ An 'administrative unit' is a geographical area with an administrative authority that has the power to take administrative or policy decisions for that area within the legal and institutional framework of the Member State (Regulation 1059/2003, art. 3 (2)).

TABLE 3**Population thresholds of the NUTS levels in the NUTS Regulation**

NUTS level	Minimum	Maximum
NUTS 1	3 million	7 million
NUTS 2	800 000	3 million
NUTS 3	150 000	800 000

For the creation of non-administrative layers, every single region needs to fit into the thresholds, but deviations exist for particular geographical, socio-economic, historical, cultural, or environmental circumstances, especially for islands and outermost regions.

d) The NUTS are complemented at the lower level by local administrative units (LAU)

Districts and municipalities constitute a more detailed level than NUTS 3. These are called 'Local administrative units' (LAUs) and are the lower-level building blocks of the NUTS regions ⁽¹³⁾.

Amending NUTS

The NUTS Regulation lays down the rules for amendments of the regional breakdown.

No earlier than at least three years after the previous amendment, the Commission can launch the procedure to renew the classification, often following notifications by Member States about changes in their administrative (or non-administrative) structures. In close cooperation with the Member States, the Commission initiates the legislative procedure to amend the annexes of the NUTS Regulation, in which the territorial units are specified.

A number of detailed rules apply; while changes in national administrative regions generally automatically lead to a change in the NUTS classification, for non-administrative units the NUTS Regulation stipulates that changes must entail a reduction of the standard deviation of the size in terms of population of at the given level.

The results of the latest amendment round are reflected in this publication, as adopted by the [Commission Delegated Regulation 2023/674](#) of 26 December 2022, entered into force on 13 April 2023 and applicable, with regard to the transmission of data to the Commission (Eurostat), from 1 January 2024. All agreed changes are reflected in this publication.

Purpose of NUTS

The NUTS serves as a reference:

a) For the collection, development, and harmonisation of the European Union's regional statistics

During the 1970s, NUTS gradually replaced the specific territorial divisions used in the various statistical domains (agricultural regions, transport regions, etc.), and it was on the basis of NUTS that regional economic accounts were developed, and the regional sections of EU surveys were defined.

The NUTS still ensures that regional data is collected on an agreed and harmonised basis, making certain that the data is comparable between the regions and across statistical domains.

b) For socio-economic analyses on different regional levels

The different levels of NUTS provide an analytical scheme. The 1961 Brussels Conference on Regional Economies, organised by the Commission, found that NUTS 2 (basic regions) was the framework generally used by Member States to apply their regional policies and is therefore the appropriate level for analysing regional/national problems. On the other hand, NUTS 1

⁽¹³⁾ <http://ec.europa.eu/eurostat/web/nuts/local-administrative-units>

(major socio-economic regions grouping together basic regions) should be used for analysing regional problems within the EU, such as 'the effect of the customs union and economic integration on areas at the next level down from national areas'. NUTS 3, which broadly comprises regions which are too small for complex economic analyses, may be used for specific analyses or to pinpoint where regional measures need to be taken.

c) For focusing EU Cohesion Policy funding

In order to efficiently distribute the European Regional Development Fund (ERDF) and the European Social Fund Plus (ESF+) at regional level, NUTS 2 regions are classified into less developed regions, transition regions and more developed regions based on their economic performance ⁽¹⁴⁾. Regional data based on the NUTS classification also play a crucial role in the distribution of available resources from the ERDF and the ESF+ among Member States.

Regional classification beyond the EU

The NUTS is only defined for the 27 Member States of the European Union. Concerning the countries that make up the European Free Trade Association (EFTA) and most of the EU candidate countries and the potential candidates, Eurostat has drafted, together with them, a nomenclature of statistical regions intended to produce a hierarchy similar to the NUTS. The label 'Statistical Region' is used to stress that despite applying the rules and principles of the NUTS Regulation, the legal act does not apply in these countries. Nonetheless, for candidate countries, the breakdown into statistical regions, agreed bilaterally, will become part of the NUTS and subject to its provisions in the NUTS Regulation upon accession to the EU. For additional information on these, please refer to our website ⁽¹⁵⁾.

Main characteristics

The current NUTS nomenclature, applicable from 1 January 2024, subdivides the economic territory of the European Union into 92 regions at NUTS 1 level, 244 regions at NUTS 2 level and 1165 regions at NUTS 3 level.

Below those, the Local Administrative Units (LAUs) have been defined. This LAU level consists of around 95 200 municipalities or equivalent administrative units in the 27 EU Member States (as of 1 January 2024).

The aim of the NUTS classification is to ensure that comparable regions appear at the same NUTS level. With the population size being defined in the NUTS Regulation as a key indicator for comparability, each level inevitably contains regions that differ greatly in terms of area, economic weight, or administrative powers.

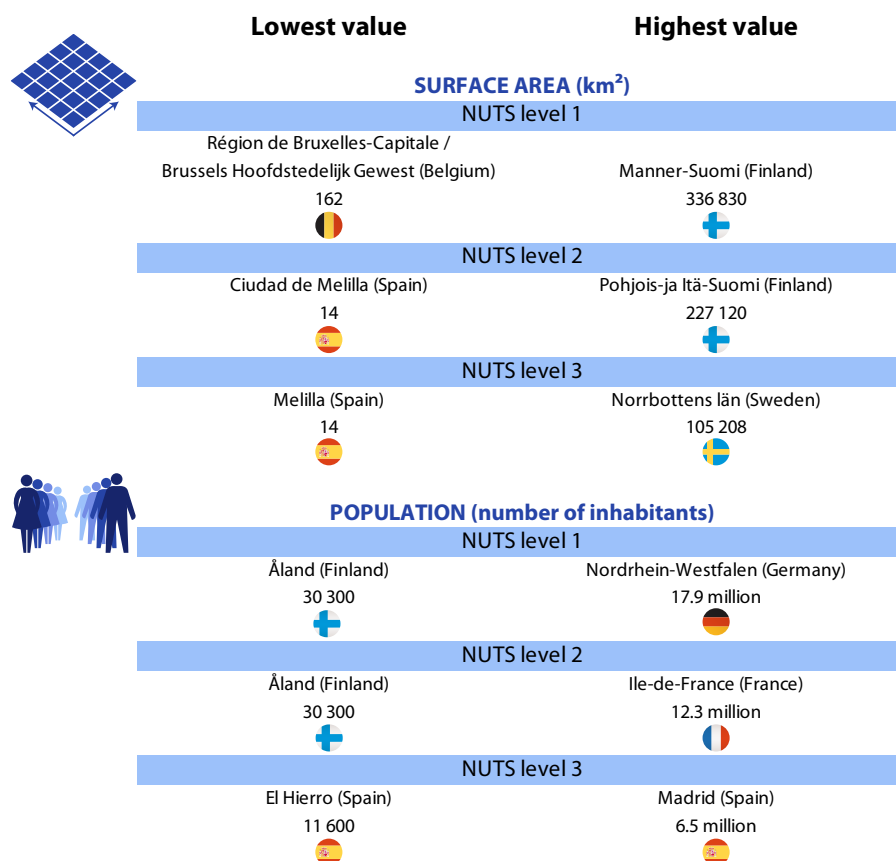

Some examples in Figure 1 illustrate the heterogeneity of the regions, focusing here on area size and the population figures.

⁽¹⁴⁾ [Commission Implementing Decision \(EU\) 2021/1130 of 5 July 2021](#) setting out the list of regions eligible for funding from the European Regional Development Fund and the European Social Fund Plus and of Member States eligible for funding from the Cohesion Fund for the period 2021-2027. OJ L 244, 9.7.2021, p. 10–20.

⁽¹⁵⁾ <https://ec.europa.eu/eurostat/web/nuts/non-eu-regions>

FIGURE 1

Heterogeneity of NUTS regions based on their area and population figures

Tables 6 and 7 show the largest, smallest, and average areas and populations at the three NUTS levels for each Member State and for the European Union as a whole.

Changes compared to NUTS 2021

There were no changes at NUTS 1 level. Belgium, the Netherlands and Portugal modified the NUTS 2 level. In six Member States, changes at NUTS 3 level occurred. All changes in the current NUTS version (NUTS 2024) compared to NUTS 2021 are shown in Table 4. (Changes that affected an administrative layer have been marked with an asterisk.)

TABLE 4**Changes between NUTS 2021 and NUTS 2024**

Country	NUTS 1	NUTS 2	NUTS 3
Belgium		Name correction of the region with the code BE31: 'Prov. Brabant wallon'. (*)	
Germany			Two boundary shifts affecting two regions in each case and three regions merged into two. (*)
Italy			Name change of the region with the code ITF65: 'Reggio Calabria'. (*)
Latvia			Four regions merged into three.
Hungary			Name change of the region with the code HU333: 'Csongrád-Csanád'. (*)
Netherlands		Boundary shift between Utrecht and Zuidoost-Zuid-Holland. (*)	Six boundary shifts affecting two regions in each case. Code changes due to the boundary shift on NUTS level 2.
Portugal		Three regions split into five.	Two boundary shifts affecting two regions in each case. Code changes due to the boundary shifts on NUTS level 2. Name change of the region with the code PT11B: 'Alto Tâmega e Barroso'. (*)
Finland			Three boundary shifts affecting two regions in each case and one boundary shift affecting three regions. (*)

(*) Administrative layers affected by the change.

In addition, boundary shifts between two pairs of NUTS level 3 regions occurred in Italy ('Pesaro e Urbino' and 'Rimini') and in Austria ('Oststeiermark' and 'West- und Südsteiermark'). However, these adjustments did not qualify for NUTS changes as they involved a population transfer of less than one percent of the NUTS regions concerned (art. 5(2) of the NUTS Regulation).

Moreover, Annexes II and III of the NUTS Regulation have also been amended in order to update the list of existing administrative units at different NUTS levels and the local administrative units as defined for each Member State. In Annex II, the existing administrative layer in Italy, corresponding to NUTS level 3, is now 'Province' and 'Città Metropolitane'. In Annex III, the local administrative units changed for Bulgaria to 'Общини (Obshtini)', for Ireland to 'Local Electoral Areas' and for Latvia to 'Valstspilsētas, novadi'.

Finally, the United Kingdom's regional breakdown was removed from the NUTS classification (Annex I of the NUTS Regulation) following the country's withdrawal from the European Union. References to this country's administrative units in Annexes II and III have also been deleted.

A map of the North East of England, showing the boundaries and colors of its constituencies. The map is divided into numerous constituencies, each labeled with a unique identifier. The colors used are green, brown, and blue. The map shows the coastline of the North East of England, including the Humber and the North Sea. The constituencies are labeled with codes such as DE266, DE265, DE264, DE261, DE269, DE26A, DE262, DE26B, DE267, DE263, DE268, DE26C, DE247, DE243, DE24A, DE244, DE249, DE24C, DE24B, DE24D, DE241, DE242, DE246, DE23A, DE237, DE233, DE234, DE231, DE239, DE235, DE236, DE238, DE232, DE22B, DE229, DE225, DE222, DE228, DE22A, DE22C, DE221, DE227, DE21B, DE21G, DE214, DE21A, DE21H, DE21I, DE21J, Annex 1 - Consolidated NUTS Base Act

Consolidated text: REGULATION (EC) No 1059/2003 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 26 May 2003 on the establishment of a common classification of territorial units for statistics (NUTS) ⁽¹⁷⁾

Article 1

Subject matter

1. This Regulation establishes a common statistical classification of territorial units (NUTS), in order to enable the collection, compilation and dissemination of European statistics at different territorial levels of the Union.
2. The NUTS classification is set out in Annex I.
3. Local administrative units (LAU), as referred to in Article 4, shall complement the NUTS classification.
4. Statistical grids, as referred to in Article 4a, shall complement the NUTS classification. Those statistical grids shall be used to calculate population-based territorial typologies.
5. Union territorial typologies, as referred to in Article 4b, shall complement the NUTS classification by attributing types to the territorial units.

Article 2

Structure

1. The NUTS classification subdivides the economic territory of the Member States, as defined in Decision 91/450/EEC, into territorial units. It ascribes to each territorial unit a specific code and name.
2. The NUTS classification is hierarchical. It subdivides each Member State into NUTS level 1 territorial units, each of which is subdivided into NUTS level 2 territorial units, these in turn each being subdivided into NUTS level 3 territorial units.
3. However, a particular territorial unit may be classified at several NUTS levels.
4. At the same NUTS level, two different territorial units in the same Member State may not be identified by the same name. If two territorial units in different Member States have the same name, the country identifier is added to the territorial units' names.

Article 3

Classification criteria

1. Existing administrative units within the Member States shall constitute the first criterion used for the definition of territorial units.

To this end, 'administrative unit' shall mean a geographical area with an administrative authority that has the power to take administrative or policy decisions for that area within the legal and institutional framework of the Member State.

⁽¹⁷⁾ This text is the latest consolidated version, as of 1/1/2024. See: <http://data.europa.eu/eli/reg/2003/1059/2024-01-01>

2. In order to establish the relevant NUTS level in which a given class of administrative units in a Member State is to be classified, the average size of this class of administrative units in the Member State shall lie within the following population thresholds:

Level	Minimum	Maximum
NUTS 1	3 million	7 million
NUTS 2	800 000	3 million
NUTS 3	150 000	800 000

If the population of a whole Member State is below the minimum threshold for a given NUTS level, the whole Member State shall be one NUTS territorial unit for this level.

3. For the purpose of this Regulation, the population of a territorial unit shall consist of those persons who have their usual place of residence in this area.
4. The existing administrative units used for the NUTS classification are set out in Annex II. The Commission shall be empowered to adopt delegated acts in accordance with Article 7a to amend Annex II on the basis of the changes in the administrative units that have been communicated to it by the Member State concerned in accordance with Article 5(1).
5. If for a given level of NUTS no administrative units of a suitable scale exist in a Member State, in accordance with the criteria referred to in paragraph 2, this NUTS level shall be constituted by aggregating an appropriate number of existing smaller contiguous administrative units. This aggregation shall take into consideration such relevant criteria as geographical, socio-economic, historical, cultural or environmental circumstances.
- The resulting aggregated units shall hereinafter be referred to as 'non-administrative units'. The size of the non-administrative units in a Member State for a given NUTS level shall lie within the population thresholds referred to in paragraph 2.
- Some non-administrative units may, however, deviate from those thresholds because of particular geographical, socioeconomic, historical, cultural or environmental circumstances, especially in the islands and the outermost regions.

Article 4

Local administrative units

1. In each Member State, local administrative units (LAU) shall subdivide NUTS level 3 into one or two further levels of territorial units. At least one of the LAU levels shall be an administrative unit as defined in Article 3(1) and as set out in Annex III. The Commission shall be empowered to adopt delegated acts in accordance with Article 7a to amend the list of LAU in Annex III on the basis of the changes in the administrative units that have been communicated to it by the Member State concerned in accordance with Article 5(1).
2. Within the first six months of each year, Member States shall transmit to the Commission (Eurostat), with reference to 31 December of the previous year, the list of LAU indicating any changes and the NUTS 3 region to which they belong. In doing so it shall follow the electronic data format requested by the Commission (Eurostat).
3. The Commission (Eurostat) shall publish the list of LAU in the dedicated section of its website by 31 December of each year.

Article 4a

Statistical grids

The Commission (Eurostat) shall maintain and publish a system of statistical grids at Union level in the dedicated section of its website. The statistical grids shall conform to the specifications laid down in Commission Regulation (EU) No 1089/2010 ⁽¹⁾.

Article 4b

Union territorial typologies

1. The Commission (Eurostat) shall maintain and publish in the dedicated section of its website Union typologies composed of territorial units at the levels of NUTS, LAU and grid cells.
2. The grid-based typology shall be established at the 1 km² grid resolution level as follows:

- ‘urban centres’,
- ‘urban clusters’,
- ‘rural grid cells’.

3. The following typologies shall be established at LAU level:

(a) degree of urbanisation (DEGURBA):

- ‘Urban areas’;
- ‘Cities’ or ‘Densely populated areas’;
- ‘Towns and suburbs’ or ‘Intermediate density areas’;
- ‘Rural areas’ or ‘Thinly populated areas’;

(b) functional urban areas:

- ‘Cities’ plus their ‘Commuting zones’;

(c) coastal areas:

- ‘Coastal areas’;
- ‘Non-coastal areas’.

If there is more than one administrative level of LAU in a Member State, the Commission (Eurostat) shall consult that Member State to determine the administrative level of LAU that shall be used for the attribution of typologies.

4. The following typologies and labels shall be established at NUTS level 3:

(a) urban-rural typology:

- ‘Predominantly urban regions’;
- ‘Intermediate regions’;
- ‘Predominantly rural regions’;

(b) metropolitan typology:

- ‘Metropolitan regions’;
- ‘Non-metropolitan regions’;

(c) coastal typology:

- ‘Coastal regions’;
- ‘Non-coastal regions’.

⁽¹⁾ Commission Regulation (EU) No 1089/2010 of 23 November 2010 implementing [Directive 2007/2/EC](#) of the European Parliament and of the Council as regards interoperability of spatial data sets and services (OJ L 323, 8.12.2010, p. 11).

5. The Commission shall, by means of implementing acts, set out uniform conditions for the harmonised application of the typologies at Union level. Those conditions shall describe the method according to which the typologies will be assigned to the individual LAU and NUTS level 3 regions. When applying the uniform conditions, the Commission shall take into account geographical, socioeconomic, historical, cultural and environmental circumstances. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 7.

Article 5

Amendments to NUTS

1. The Member States shall inform the Commission of:
 - (a) all changes that have occurred in administrative units, in so far as they may affect the NUTS classification, as laid down in Annex I, or the contents of Annexes II and III;
 - (b) all other changes at the national level that may affect the NUTS classification, in accordance with the classification criteria laid down in Article 3.
2. Changes to NUTS level 3 boundaries due to changes of smaller administrative units as laid down in Annex III:
 - (a) shall not be considered as amendments of NUTS if they involve a population transfer equal to or less than one percent of the NUTS 3 territorial units concerned;
 - (b) shall be considered as amendments of NUTS, in accordance with paragraph 3 of this Article, if they involve a population transfer of more than one percent of the NUTS 3 territorial units concerned.
3. Amendments to the NUTS for the non-administrative units in a Member State, as referred to in Article 3(5), may be made if, at the NUTS level in question, the amendment reduces the standard deviation of the size in terms of population of all EU territorial units.
4. Amendments to the NUTS classification in Annex I shall be adopted in the second half of the calendar year, every three years at the earliest, on the basis of the criteria set out in Article 3. Nevertheless, if there is a substantial reorganisation of the relevant administrative structure of a Member State, such amendments to the NUTS classification may be adopted at shorter intervals.
The Commission shall be empowered to adopt delegated acts in accordance with Article 7a to amend the NUTS classification referred to in the first subparagraph of this paragraph on the basis of the changes in the territorial units that have been communicated to it by the Member State concerned in accordance with paragraph 1 of this Article. Regional data which the Member States send to the Commission (Eurostat) shall be based on the amended NUTS classification starting from 1 January of the second year after the adoption of that delegated act.
5. In the event that the Commission adopts a delegated act as referred to in paragraph 4, the Member State concerned shall transmit to the Commission (Eurostat) the time series for the new regional breakdown, to replace data already transmitted. The Member State concerned shall transmit these time series by 1 January of the fourth year after the adoption of that delegated act.
The Commission shall, by means of implementing acts, set out uniform conditions for time series and their length, taking into account the feasibility of providing them. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 7.

Article 6

Management

The Commission shall take the necessary measures to ensure the consistent management of the NUTS classification. In particular, such measures may include:

- (a) drafting and updating of explanatory notes on NUTS;

- (b) examination of problems arising from the implementation of NUTS in the Member States' classifications of territorial units.

Article 7

Committee procedure

1. The Commission shall be assisted by the European Statistical System Committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.
2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

Article 7a

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.
2. The power to adopt delegated acts referred to in Articles 3(4), 4(1) and 5(4) shall be conferred on the Commission for a period of five years from 18 January 2018. The Commission shall draw up a report in respect of the delegation of power not later than nine months before the end of the five-year period. The delegation of power shall be tacitly extended for periods of an identical duration, unless the European Parliament or the Council opposes such extension not later than three months before the end of each period.
3. The delegation of power referred to in Articles 3(4), 4(1) and 5(4) may be revoked at any time by the European Parliament or by the Council. A decision of revocation shall put an end to the delegation of the power specified in that decision. It shall take effect on the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.
4. Before adopting a delegated act, the Commission shall consult experts designated by each Member State in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making.
5. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.
6. A delegated act adopted pursuant to Articles 3(4), 4(1) and 5(4) shall enter into force only if no objection has been expressed either by the European Parliament or by the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 9

Entry into force

This Regulation shall enter into force on the 20th day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

ANNEX I

The NUTS classification

Please note that the tables from this section of the regulation appear earlier in this publication and so have not been repeated again here.

ANNEX II

Existing administrative units

At NUTS level 1 for Belgium 'Gewesten/Régions', for Germany 'Länder', for France 'Régions', and for Portugal 'Continente', 'Região Autónoma dos Açores' and 'Região Autónoma da Madeira'.

At NUTS level 2 for Belgium 'Provincies/Provinces', for Denmark 'Regioner', for Greece 'Περιφέρειες (Periferies)', for Spain 'Comunidades Autónomas, Ciudades Autónomas', for Italy 'Regioni', for the Netherlands 'Provincies', for Austria 'Länder' and for Poland 'Województwa'.

At NUTS level 3 for Belgium 'Arrondissementen/Arrondissements', for Bulgaria 'Области (Oblasti)', for Czechia 'Kraje', for Germany 'Kreise, kreisfreie Städte', for Spain 'Provincias, Consejos insulares' and 'Cabildos', for France 'Départements', for Croatia 'Županije', for Italy 'Province' and 'Città Metropolitane', for Lithuania 'Apskritis', for Hungary 'Megyék', for Portugal 'Entidades Intermunicipais', 'Região Autónoma dos Açores' and 'Região Autónoma da Madeira', for Romania 'Județe', for Slovakia 'Kraje', for Finland 'Maakunnat/Landskap' and for Sweden 'Län'.

ANNEX III

Local administrative units

For Belgium 'Gemeenten/Communes', for Bulgaria 'Общини (Obshtini)', for Czechia 'Obce', for Denmark 'Kommuner', for Germany 'Gemeinden', for Estonia 'Linn, vald', for Greece 'Δήμοι (Dimoi)', for Spain 'Municipios', for France 'Communes', for Croatia 'Gradovi, općine', for Ireland 'Local Electoral Areas', for Italy 'Comuni', for Cyprus 'Δήμοι, κοινότητες (Dimoi, koinotites)', for Latvia 'Valstspilsētas, novadi', for Lithuania 'Savivaldybės', for Luxembourg 'Communes', for Hungary 'Települések', for Malta 'Localities', for the Netherlands 'Gemeenten', for Austria 'Gemeinden', for Poland 'Gminy', for Portugal 'Freguesias', for Romania 'Municipii, Orașe' and 'Comune', for Slovenia 'Občine', for Slovakia 'Obce', for Finland 'Kunnat/Kommuner', and for Sweden 'Kommuner'.

Annex 2 - Latest NUTS Amending Regulation

COMMISSION DELEGATED REGULATION (EU) 2023/674 of 26 December 2022 amending the Annexes to Regulation (EC) No 1059/2003 of the European Parliament and of the Council on the establishment of a common classification of territorial units for statistics (NUTS)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1059/2003 of the European Parliament and of the Council of 26 May 2003 on the establishment of a common classification of territorial units for statistics (NUTS) ⁽¹⁾, and in particular Article 3(4), Article 4(1) and Article 5(4) thereof,

Whereas:

1. Regulation (EC) No 1059/2003 establishes a common classification of territorial units to enable the collection, compilation and dissemination of harmonised regional statistics in the Union.
2. The Annexes to Regulation (EC) No 1059/2003 list the territorial units to be used for statistics.
3. In accordance with Article 5(4) of Regulation (EC) No 1059/2003, amendments to the NUTS classification are to be adopted in the second half of the calendar year, and usually not more frequently than every 3 years.
4. The NUTS classification was last amended by Commission Delegated Regulation (EU) 2019/1755 ⁽²⁾.
5. According to the information provided to the Commission by Member States, the territorial division of several Member States has changed since the NUTS classification was last amended.
6. Regulation (EC) No 1059/2003 should therefore be amended accordingly,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes I, II and III to Regulation (EC) No 1059/2003 are replaced by the text in the Annex to this Regulation.

Article 2

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply for the transmission of data to the Commission (Eurostat) from 1 January 2024.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 26 December 2022.

For the Commission

The President

Ursula VON DER LEYEN

⁽¹⁾ OJ L 154, 21.6.2003, p. 1.

⁽²⁾ Commission Delegated Regulation (EU) 2019/1755 of 8 August 2019 amending the Annexes to Regulation (EC) No 1059/2003 of the European Parliament and of the Council on the establishment of a common classification of territorial units for statistics (NUTS) (OJ L 270, 24.10.2019, p. 1).

Annex 3 - NUTS implementing Regulation on territorial typologies

COMMISSION IMPLEMENTING REGULATION (EU) 2019/1130 of 2 July 2019 on the uniform conditions for the harmonised application of territorial typologies pursuant to Regulation (EC) No 1059/2003 of the European Parliament and of the Council

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1059/2003 of the European Parliament and of the Council of 26 May 2003 on the establishment of a common classification of territorial units for statistics (NUTS) ⁽¹⁾, and in particular Article 4b(5) thereof,

Whereas:

1. Regulation (EC) No 1059/2003 constitutes the legal framework for the regional classification of the Union in order to enable the collection, compilation and dissemination of harmonised regional statistics.
2. Article 4b of Regulation (EC) No 1059/2003 empowers the Commission to establish at Union level uniform conditions for the harmonised application of the territorial typologies referred to in that Article.
3. Those conditions should describe the method for assigning the typologies to individual local administrative units (LAUs) and Nomenclature of Territorial Units for Statistics (NUTS) level 3 regions.
4. When applying the uniform conditions, it is important to take account of geographical, socioeconomic, historical, cultural and environmental circumstances.
5. The measures provided for in this Regulation are in accordance with the opinion of the European Statistical System Committee,

HAS ADOPTED THIS REGULATION:

Article 1

The uniform conditions for the harmonised application of the grid-based typology and the LAU-level and NUTS level 3 typologies shall be those set out in the Annex.

Article 2

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 2 July 2019.

For the Commission

The President
Jean-Claude JUNCKER

⁽¹⁾ OJ L 154, 21.6.2003, p. 1.

Annex

1. The uniform conditions for the harmonised application of the grid-based typology shall be the following:

Element as established in Regulation (EC) No 1059/2003	Labels	Conditions
Grid-based typology	'Rural grid cells' or 'Low density grid cells'	1 km ² grid cells with density below 300 inhabitants/km ² and other cells outside urban clusters.
	'Urban clusters' or 'Moderate density clusters'	Contiguous (including diagonals) 1 km ² grid cells with a density of at least 300 inhabitants/km ² , and a minimum of 5 000 inhabitants in the cluster.
	'Urban centres' or 'High density clusters'	Contiguous (without diagonals) 1 km ² grid cells within the 'urban cluster' with a density of at least 1 500 inhabitants/km ² and a minimum of 50 000 inhabitants in the cluster after gap filling.

2. The uniform conditions for the harmonised application of the typologies at LAU level shall be the following:

Element as established in Regulation (EC) No 1059/2003	Labels		Conditions
Degree of urbanisation (DEGURBA)	'Urban areas'	'Cities' or 'Densely populated areas'	LAU level territorial units where at least 50 % of the population lives in urban centres.
		'Towns and suburbs' or 'Intermediate density areas'	LAU level territorial units where less than 50 % of the population lives in rural grid cells and less than 50 % lives in urban centres.
	'Rural areas' or 'Thinly populated areas'		LAU level territorial units where at least 50 % of the population lives in rural grid cells.
Functional urban areas	'Functional urban areas'	'Cities'	LAU level territorial units defined as 'Cities' or 'Densely populated areas'
		'Commuting zone'	LAU level territorial units from which at least 15 % of the employed population commutes to the city, whereby enclaves are included and exclaves are excluded.
Coastal areas	'Coastal areas'		LAU level territorial units that border the sea or that have at least 50 % of their surface within a distance of 10 km from the sea. Enclaves (non-coastal LAUs surrounded by adjacent coastal LAUs) are added.
	'Non-coastal areas'		LAU level territorial units that are not 'Coastal areas' i.e. that do not border the sea and have less than 50 % of their surface within a distance of 10 km from the sea.

3. The uniform conditions for the harmonised application of the typologies at NUTS level 3 shall be the following:

Element as established in Regulation (EC) No 1059/2003	Labels	Conditions
Urban-rural typology	'Predominantly urban regions'	NUTS level 3 regions where at least 80 % of the population live in urban clusters.
	'Intermediate regions'	NUTS level 3 regions where more than 50 % but less than 80 % of the population live in urban clusters.
	'Predominantly rural regions'	NUTS level 3 regions where at least 50 % of the population live in rural grid cells.
Metropolitan typology	'Metropolitan regions'	A single or an aggregation of NUTS level 3 region(s) in which at least 50 % of the population live in functional urban areas of at least 250 000 inhabitants.
Coastal typology	'Non-metropolitan regions'	NUTS level 3 regions that are not 'Metropolitan regions'.
	'Coastal regions'	NUTS level 3 regions that border the sea, or those in which at least 50 % of the population live within 50 km from the coastline, as well as the NUTS level 3 region of Hamburg (Germany).
	'Non-coastal regions'	NUTS level 3 regions that are not 'Coastal regions'.

GETTING IN TOUCH WITH THE EU

In person

All over the European Union there are hundreds of Europe Direct centres. You can find the address of the centre nearest you online (european-union.europa.eu/contact-eu/meet-us_en).

On the phone or in writing

Europe Direct is a service that answers your questions about the European Union. You can contact this service:

- by freephone: 00 800 6 7 8 9 10 11 (certain operators may charge for these calls),
- at the following standard number: +32 22999696,
- via the following form: european-union.europa.eu/contact-eu/write-us_en.

FINDING INFORMATION ABOUT THE EU

Online

Information about the European Union in all the official languages of the EU is available on the Europa website (european-union.europa.eu).

EU publications

You can view or order EU publications at op.europa.eu/en/publications. Multiple copies of free publications can be obtained by contacting Europe Direct or your local documentation centre (european-union.europa.eu/contact-eu/meet-us_en).

EU law and related documents

For access to legal information from the EU, including all EU law since 1951 in all the official language versions, go to EUR-Lex (eur-lex.europa.eu).

EU open data

The portal data.europa.eu provides access to open datasets from the EU institutions, bodies and agencies. These can be downloaded and reused for free, for both commercial and non-commercial purposes. The portal also provides access to a wealth of datasets from European countries.

Regions in the European Union Nomenclature of territorial units for statistics (NUTS)

This document presents the tables and maps of the current NUTS classification with 92 regions at NUTS level 1, 244 regions at NUTS level 2 and 1165 regions at NUTS level 3. The NUTS is the official territorial division of the EU for regional statistics.
