28B.	Comparative loss of life from tuberculosis, cancer, heart diseases, motor vehicle and other accidents and other causes of death: Females 2001	48
29.	Death rates specific to sex and age group: 2000 - 2001	49
30.	Abridged Life Table: 2001	50
31.	Expectation of life, 1870 / 72 to 1995 and 2001	51
32.	Migrants yearly: 1992 - 2001	52
33.	Emigrants classified by age-group, sex and country of future permanent residence: 2001	53
34.	Emigrants classified by month, country of destination, and sex: 2001	54
35.	Emigrants classified by occupation, country of destination and sex: 2001	55
36.	Emigrants classified by Socio-Economic groups, age group and sex: 2001	57
37.	Emigrants classified by region, district and locality, gender and country of destination: 2001	59
38.	Emigrants by socio-economic groups as a percentage of the total for the years: 1997 - 2001	61
39.	Returning migrants classified by month, country of last residence and sex: 2001	62
40.	Returning migrants classified by age group, sex and country of last residence: 2001	63
41.	Returning migrants classified by age-groups, sex and duration of stay in the country of last residence: 2001	64
42.	Returning migrants classified by sex, region, district and locality of settlement: 1996 - 2001	65
43.	Non-Maltese nationals settling in the Maltese Islands classified by age groups: 1997 – 2001	68
44.	Non-Maltese nationals settling in the Maltese Islands classified by region and district of settlement and sex: 1998 – 2001	69

45.	Non-Maltese nationals settling in the Maltese Islands classified by nationality, month and sex: 2001	70
46.	Non-Maltese nationals settling in the Maltese Islands classified by age and sex: 2001	71
47.	Number and rate of Marriages: 1992 - 2001	72
48.	Monthly and quarterly incidence of marriages: 1992 - 2001	73
49.	Marriages classified by age group of spouses: 2001	74
50.	Marriages classified by nationality and age group of spouses: 2001	75
51.	Marriages classified by age and previous marital condition of bride and bridegroom: 2000 – 2001	76
52.	Marriages by age group, sex and occupation of spouses: 2001	78
53A.	Spouses classified by previous marital condition and district origin in Malta: 2001	84
53B.	Spouses classified by previous country of residence and marital condition: 2001	84
54A.	Spouses classified by nationality and district in Malta: 2001	85
54B.	Spouses classified by nationality and previous country of residence: 2001	86
55.	Civil marriages by age group, sex and socio economic groups: 2001	87

Introduction

1. DEMOGRAPHIC DEVELOPMENT

1.1 Population Growth

The estimates of the total population (including work and resident permit holders and foreigners residing in Malta) for 2001 showed that the Maltese Islands are inhabited by 394,641 persons whereof 195,863 are males and 199,278 are females. The number of foreign residents represents 2.5 per cent of the total population.

The publication presents the main demographic events registered. Population change is the net result of two demographic aspects: the difference between births and deaths and the migration balance. Both were positive during the year 2001. There was a natural increase of 924 persons and a net migration inflow of 399 persons. As a result the end year Maltese population (excluding permanent foreign residents) stood at 385,077 consisting of 191,025 males and 194,052 females.

1.2 Composition

The population of the Maltese Islands like the rest of European countries is ageing. The aged-child ratio in the year 2001 consisted of 65 old persons per 100 children.

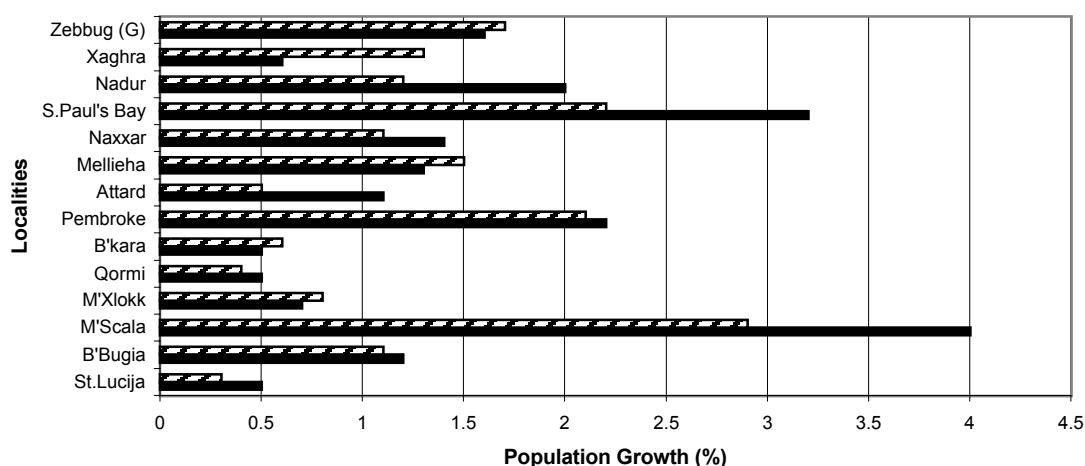

The working population, i.e., 15-64 age group amounted to 261,776, whereas the 0-14 and the 65 plus age brackets consisted of 74,845 and 48,456 respectively. Hence the Total Dependency Ratio for 2001 was 47.10.

Regarding the total population, the aged-child ratio for the year 2001 is the same as that in respect of the Maltese population. The working age population stood at 268,968, whereas the 0-14 and the 65+ groups consisted of 75,955 and 49,718 respectively.

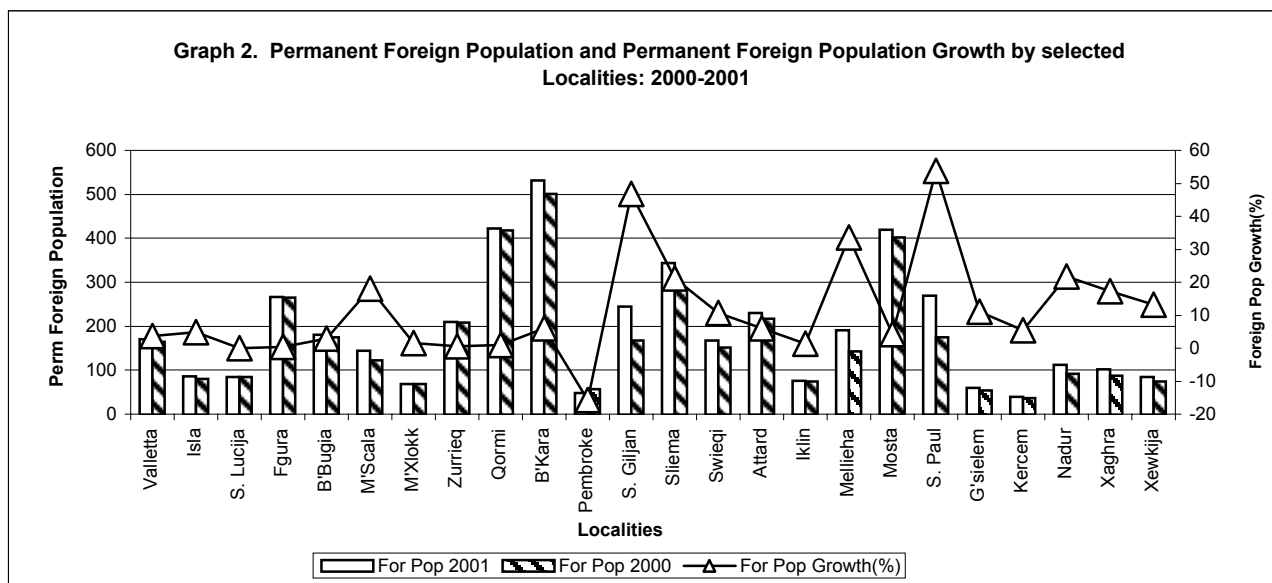

1.3 The Localities

The Northern Harbour District still makes the largest part of the population as it includes the largest towns on the Islands such as Qormi, Hamrun, San Gwann, Sliema and Birkirkara. Localities such as Valletta and Isla decreased their Maltese population in year 2001. Localities such as St. Paul's Bay and Marsascala had a substantial increase in Maltese population growth between 2000 and 2001.

Graph 1. Maltese Population Growth by selected Localities: 1999-2001

Though Valletta and Isla suffered a decrease in the Total and the Maltese population growth, both localities were the most likely places within the Southern Harbour district to attract foreign residents in year 2001. The total foreign population growth between 2000 and 2001 was of 7.6 per cent. Gozo experienced 18.9 per cent of permanent foreign population growth between 2000 and 2001 when calculated separately as a region.

2. VITAL STATISTICS

2.1 Fertility

The number of newborns to Maltese parents was 3,859 which was again lower than last year by 396 and is now the lowest recorded over the past thirty years. The continuous drop is being observed in other countries. This is a relevant indicator to the future structure of the Maltese population, the total fertility rate being 1.72.

The Crude Birth Rate, dropped to 10.05 in 2001. Babies born to parents of other nationalities residing in Malta, amounted to 76. Birkirkara registered the largest number of births with 222, however it was Xghajra and Marsasclala which scored the highest Crude Birth Rates of 29.73 and 26.72 respectively.

In 2001 there were 499 births outside marriage, which is 12.9 per cent of the total births.

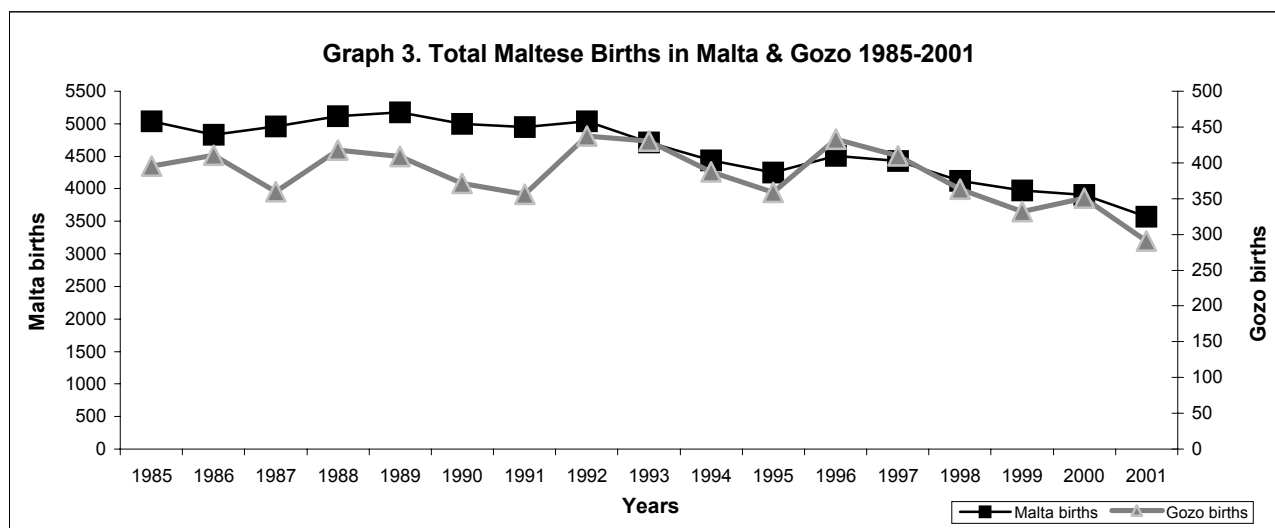

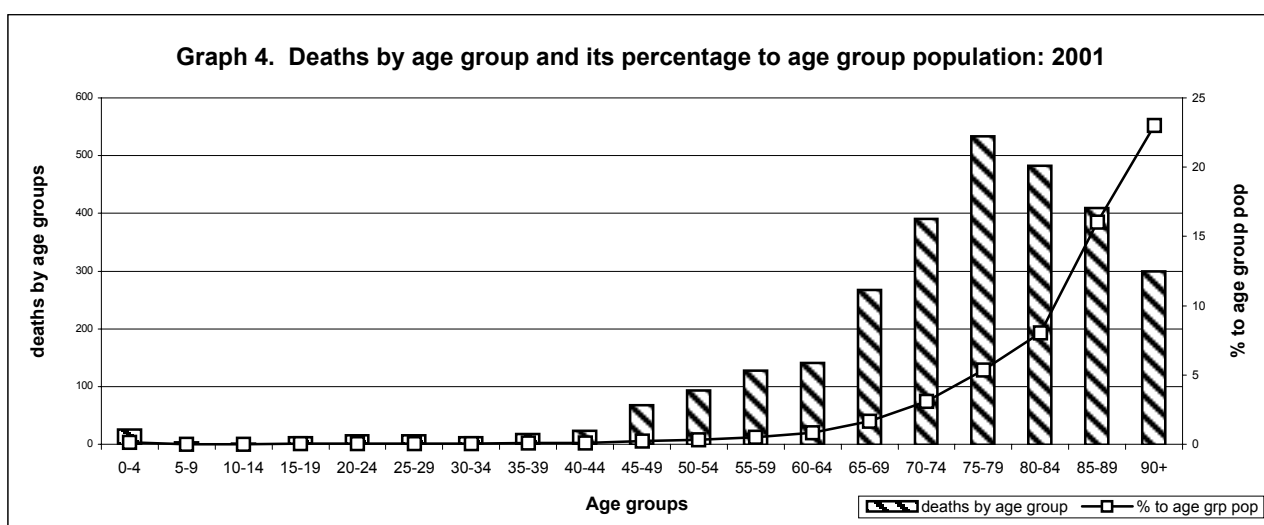

Table 13 gives a breakdown of the socio-economic background of the fathers who had babies during the year. The highest percentage of the fathers were coming from the Craft and Related Works Sectors with 687 fathers.

2.2 Mortality and Health

The numbers of deaths dropped by 0.7 per cent from last year as it registered 2,935 (1,496 males and 1,439 females) with the Crude Death Rate being at 7.65. Infant deaths decreased to 17 from 26 with an infant mortality rate of 4.4.

February 2001 registered the highest numbers of deaths with 293 cases. Apart from Luqa where the main Government Home for the Elderly (St. Vincent De Paule Residence) is situated, there were also high numbers of deaths registered in Rabat and Sliema. However the highest Crude Death Rate resulted in Floriana, Valletta and Fontana.

The highest number of deaths again occurred in the 75-79 Age Group. The Expectation of Life for the year 2001 was 76.07 for males and 80.87 for females.

The main risk factors were, as ever, the diseases of the circulatory and respiratory systems and neoplasms. The respective deaths being 1,283, 361 and 723.

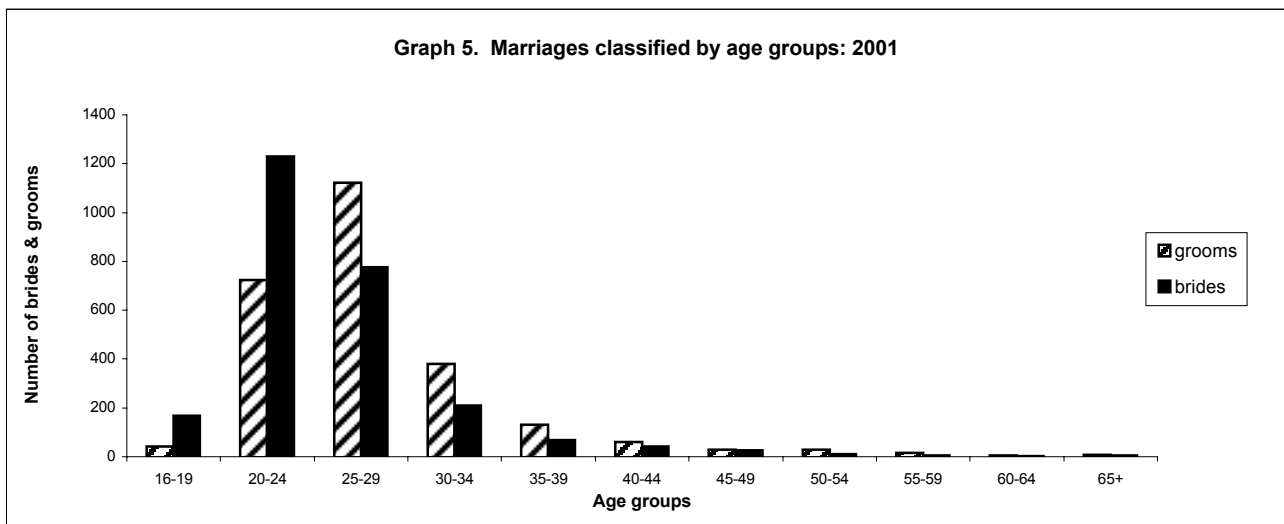

2.3 Marriages

The Crude Marriage Rate for the Maltese Islands went down to 5.72 in year 2001. Marriages in Malta went down by 13.8 per cent whilst those occurring in Gozo went down by 20 per cent this year.

Single Bridegrooms made 93.8 per cent of the total bridegrooms, while the widowed, annulled and divorced grooms made 1.2 per cent, 0.7 per cent and 4.3 per cent respectively. Single brides and the annulled made 93.9 per cent and 1.0 per cent respectively. Widowed, annulled and divorced brides and grooms came from the 30-34 and 35-39 age groups. Most male spouses had Technical professions whereas the female spouses were mostly Plant and Machine Operators.

Foreign spouses were mostly of British Nationality while most of the Maltese spouses come from the Northern Harbour District since the latter incorporates the largest towns in Malta such as B'kara, Qormi and Sliema. The month of June was the most popular month for the celebration of marriages.

Civil marriages decreased from last year by 6.8 per cent at 474 marriages, this was nearly 22 per cent of the total marriages during the year.

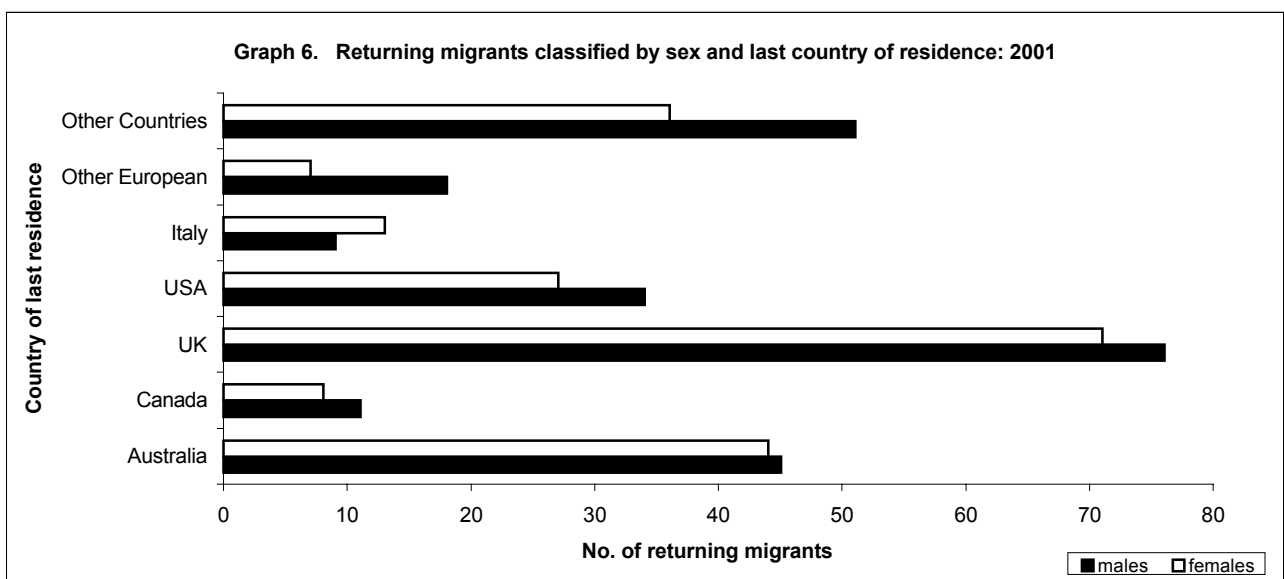

3. MIGRATION

Most Mediterranean countries have had a long history of migration. Malta was no exception. The migratory movement was particularly evident in the 1950s and 1960s. Since the mid-70s Malta received back thousands of former emigrants. The present migration dimension in Maltese demography is being phased out.

During 2001, 73 persons left to settle abroad, whilst 472 returned. Also during the year there were 530 foreign settlers and 1,190 persons naturalized/registered as Maltese citizens. The latter being the highest ever recorded, the result of the Dual-Nationality Act which came in force in February 2000.

There were also 39 cases of child adoptions from abroad, mainly from Romania.

4. FORECASTS

Future population trends are usually based on projections which in themselves are neither forecasts nor predictions. Demographic trends are based on a number of assumptions about future variations in fertility, mortality rates and migration flows with the latter assumption being taken as zero.

Malta's population is still young by European standards. The 0-14 age group represents 19.4 per cent of the Maltese population, whereas the 65+ age group stands at 12.6 per cent. The number of potential workers for each pensioner gives the results as shown in last year's projections, i.e. 4:1 declining to 2.5:1 in the year 2025.

5. SOURCES OF DATA

Births statistics are derived from records held at the Public Registries of Malta and Gozo where registrations of such births are obligatory. Such births are matched with data provided from state hospitals, private hospitals and private clinics. These sources always match.

Deaths registered are forwarded to the Health Information where these are analyzed and data is sent regularly to the National Statistics Office.

6. DEFINITION OF TERMS USED

Crude Birth, Death and Marriage Rates are respectively the number of births, deaths and marriages per thousand in the mid-year population.

Sex Ratio at birth, which is used for projections of population figures, gives the number of male births per hundred female births.

Life Expectancy at Birth indicates the number of years of a newborn baby is expected to live if mortality in the various age-groups remains at the level of the period on which life expectancy is computed.

Infant Mortality Rate is the number of deaths of infants under 1 year old per 1000 live births.

Natural Increase is the excess of births over deaths. When expressed as a rate per thousand population it is the difference between the Crude Birth Rate and the Crude Death Rate.

Annulled marriage refers to annulments given by the Superior Courts or the Church Tribunal.

Divorce refers to divorces which were accepted by the laws of Malta in terms of Section 33 of The Marriage Act, 1975.

Migration data has undergone quite some changes since the Labour Department dismantled its section of Emigration in January 1995. The data hence encountered deficiencies in record availability. The only sources for prospective emigrants were those from the Embassies and the High Commissions. Since 2000 only the High Commission of Britain was complying with our requests.

Data for returning migrants and foreign settlers is derived from monthly returns from the Comptroller of Customs. Prospective settlers, both foreign and returning Maltese, have to be recorded at the Customs since they have to declare their personal effects.

Marriages are compiled at NSO from data kept at the Public Registries of the Islands. The limitations in this aspect are data relating to separations and annulments. Divorce is not recognized in the Constitution of Malta.

Population Estimates are based on Census results updated annually to take account of the components of change: births, deaths and net migration, as well as registration of foreigners as Maltese nationals.

TABLES

1. PERCENTAGE INCREASES: CENSUS YEARS 1901 - 1948, 1957, 1967, 1985 AND 1995

Census Date	Enumerated Population			Numerical Increases			Percentage Increases		
	Total	Males	Females	Total	Males	Females	Total	Males	Females
1901, 31st March	186,389	92,554	93,835	20,151	10,843	9,308	12.12	13.27	11.01

85 & Over	0.7	1.3	1.0	0.6	2.4	1.5	1.2	3.9	2.5

* Basis: End 2001 estimates of the Maltese Population

Assumption for projections:

Mortality: Death rates for each age-group and sex being the average of those recorded during 1999 - 2001

Natality: Average rates specific to age by single years of females between 14 to 49 years recorded during 1999 - 2001.

Emigration: Nil.

The column l_x shows, for each sex, the number who would survive to exact age x out of 10000 born who were subject throughout their lives to the recorded age death rates of the period. Column e_x is the 'expectation of life', that is the average future lifetime which would be lived by persons aged exactly x , if likewise subject to those death rates.

31. EXPECTATION OF LIFE, 1870/72 TO 1995 AND 2001

Age	Abridged Life Tables at Census Years										Abridged Table 2001

EVALUATION SHEET

Demographic Review 2001

In order to improve the quality of our service and meet your requirements for statistical information, we are conducting a satisfaction survey. We would therefore be grateful if you could spend a few minutes completing this questionnaire.

To thank you for your cooperation, we are pleased to offer you a free publication 'Malta in Figures'.

1. Are you satisfied with the contents of this publication?

☐

Very satisfied

☐

Not really satisfied

☐

Satisfied

☐

Not at all satisfied

2. Do you find this publication useful for your work?

☐

Yes

☐

No

☐

Partly

3. Are the data series complete enough?

☐

Yes

☐

No

4. Do you think that the variables are easy to understand?

☐

Yes

☐

No

5. What other variables would you like to see included in this publication?

6. What do you think about the data freshness?

☐

Excellent

☐

Very Good

☐

Good

☐

Not very good

☐

Not at all good

7. What do you think of the analysis and comments?

☐

Excellent

☐

Very Good

☐

Good

☐

Not very good

☐

Not at all good

8. In what form do you prefer to have this publication?

☐

Paper form

☐

Electronic form

☐

Paper and electronic form

9. Do you have other suggestions for improving this publication?

10. Do you consult other sources/organisations to obtain the data which interest you?

☐ Yes

☐ No

Please complete the details below:

☐ Mr

☐ Mrs

☐ Ms

Surname: Name:
