

Download the 'UN COVID-19 e-Learning' App

The Clinical Governance Section of the Division of Healthcare Management and Occupational Safety and Health of the Department of Operational Support has developed an application-based learning platform for both [Apple IOS](#) and [Android](#) users, called **UN COVID-19 e-learning**.

The material in this app is based on the guidance issued by the World Health Organization to prevent the spread of COVID-19. There is a total of eight modules and each module is comprised of multiple assessable learning outcomes.

All modules contain skills and activities that are required to be demonstrated to an established standard.

The UN COVID-19 e-learning app is meant to equip all UN personnel, including peacekeepers, with the knowledge and skills to protect themselves and their colleagues from COVID-19 infections.

This app will function without the need for the internet once it has been downloaded on a phone. The app is available in both English and French.

It is highly recommended that all UN personnel download this app and review the material.
